EDUCATION

The University of California

Master of Science in Computer Science

Riverside, CA

Jan. 2021 – Mar 2022

National Institute of Technology, Tiruchirappalli

Bachelor of Technology in Computer Science and Engineering

Tiruchirappalli, India

Jul. 2015 – May 2019

EXPERIENCE

Machine Learning Engineer

4L Data Intelligence

Oct 2023 – Present

San Ramon, CA

- Scraped 2M+ provider records from 1,000+ hospital sites using Craw4AI and GPT-4o-mini, cutting data acquisition time by 90%.
- Built RAG pipeline with OpenAI Assistants API; applied semantic chunking and vector DB storage to boost retrieval accuracy by 35%.
- Migrated RESTful APIs from Flask to FastAPI with async I/O, increasing throughput 2.5× and reducing response time from 1.2s to 480ms.
- Converted Figma designs into 5+ interactive dashboards with Angular, D3.js, and Tailwind CSS for company's analytics platform.
- Built ETL pipelines and Snowflake stored procedures with Snowpark Python and SQL, handling 500K+ records/day with <1% failure.
- Containerized 6+ microservices with Docker for 100% deployment success and scalable, resilient infrastructure.

Full Stack Software Engineer

Agile Datapro, Inc

Aug 2022 – Oct 2023

San Jose, CA

- Integrated GPT-3.5 Turbo into ChatBot using LangChain to suggest mitigation steps on a network analytics dashboard.
- Designed highly available microservices with Docker and Kubernetes, increasing system stability and uptime by 30%.
- Built a log-monitoring system using Elasticsearch, Logstash, and Kibana to detect and resolve performance bottlenecks.
- Improved webpage load time by 70% by building a custom CDN with S3 and CloudFront.

Software Engineer

Byte to Bit Technologies Pvt. Ltd

Jun 2018 – Dec 2020

Chennai, India

- Automated deployments using Helm Charts, reducing deployment errors by 75% and ensuring consistency across environments.
- Accelerated DB queries by 50% and reduced response time 80% by optimizing SQL with caching design pattern.
- Cut deployment time by 40% by automating CI/CD pipelines using GitHub Actions.
- Reviewed junior developers' code and PRs, enhancing code quality and minimizing defects.

Software Engineer – ML/AI

Psiog Digital (P) Ltd

May 2017 – Apr 2018

Chennai, India

- Developed NLP data pipelines with NLTK, spaCy, and PySpark on Databricks for scalable document processing.
- Trained BiLSTM-CRF model for NER on 10M PubMed articles, achieving 95.5% accuracy.
- Automated text vectorization and storage via Databricks Feature Store, reducing preprocessing time by 50%.
- Created rule-based SVO extraction using regex and grammar rules for structured information mining.

TECHNICAL SKILLS

Languages: Python, Go, C/C++, SQL (Postgres, Snowflake), JavaScript, HTML/CSS, R

Frameworks: React, Node.js, Flask, FastAPI, pytest, WordPress, Material-UI, Selenium

Developer Tools: Git, Docker, Kubernetes, GitHub Actions, Cursor, TravisCI, GCP, VS Code, IntelliJ

Libraries: pandas, NumPy, Matplotlib, spaCy, NLTK, PySpark, LangChain, OpenAI API, asyncio, D3.js, Snowpark
